KEEP OUT OF REACH OF CHILDREN. DO NOT USE IF SAFETY SEAL IS DAMAGED OR MISSING. STORE IN A COOL, DRY PLACE.

PRODUCT DESCRIPTION

The human body produces Vitamin D3 as a response to sun exposure. Vitamin D3 is essential for supporting healthy bones and teeth, promoting natural muscle function, and filling many other important roles in the body. Many people do not receive adequate amounts of D3 through diet and use supplements as a way to prevent deficiencies. Vitamin D3 and K2 both support many important functions in the body. Perhaps the most vital is regulating the absorption of calcium and phosphorus, promoting heart health, and supporting normal immune system function. These supplements are designed to provide enough vitamin D3 and K2 to support the natural growth and development of bones and teeth.†
